GREATEST FUNDING NEED - OPERATIONS

A Day of Care at Emily's House

Emily's House provides a range of client-centred programs and services for children with a life-limiting illness in a home-like environment, as well as supports for their caregivers and siblings. We provide the home-away-from-home. Our Play Therapist develops daily activities to engage and activate the kids, and to give them the chance to be kids.

A care plan is developed with parents and child prior to or at admission that includes appropriate medical supports and activities to meet each individual child's needs. No costs are passed on to the families, and **only 61 cents on the dollar is subsidized** by government sources (based on our overall operating budget).

Our greatest need is to cover the costs of care and programming that is not covered by government sources.

Care is completely customized to the needs of the child and preferences of the family, and can incorporate a "circle of care" that includes up to 30 resource people. With your support, we can help children and their families make memories out of minutes, and miracles out of days.

CLIENT IMPACT

Testimonials / Client Impact:

At fourteen-years of age, “Fearless Cassidy” spent a lot of her time at Emily’s House children’s hospice painting and creating, with her family and friends all around her, including: friends from school; her swim team; and those who were in remission after their own, personal journeys with cancer treatments. They organized a big baking party for Cassidy. She needed some help measuring ingredients, but insisted on doing as much of the baking as she could. “Cassidy was grateful that she could stay in Emily’s House to the end of her journey.” ~ Cassidy’s mom

We hear time and again how a mother is re-energized for a longer journey with their child when they have been able to draw on temporary respite programs. As Emily’s mom wrote: *“Thank you for addressing not only the full spectrum of needs of the child, but also for making therapies available to ensure the ongoing well-being of the child’s parents. It is so key to our ongoing survival.”*
